PROFESSIONAL SUMMARY

Full Stack Developer with industry experience building scalable web applications using React.js, Redux Toolkit, Node.js, and Express.js. Skilled in RESTful APIs, microservices, PostgreSQL, MySQL, MongoDB, JWT/OAuth authentication, CI/CD pipelines, and Agile/Scrum delivery. Experience integrating GenAI/LLM capabilities (Google Gemini API) into production applications. Strong foundation in OOP, DSA, DBMS, Operating Systems, and Computer Networks. Open to full-time Full Stack Developer / Software Engineer roles in India and internationally.

EDUCATION

PDA College of Engineering

Visvesvaraya Technological University

Bachelor of Engineering – Information Science & Engineering

Karnataka, India

Aug 2020 – Jun 2024

SKILL SUMMARY

Programming Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL

Frameworks: React.js, Redux Toolkit, Node.js, Express.js, Tailwind CSS, SCSS

Databases/ORM: PostgreSQL, MySQL, MongoDB, Mongoose ODM, Prisma ORM, Redis

Tools/Technologies: Git, GitHub, Postman, Vite, JWT/OAuth, Zod, RTK Query

DevOps & Cloud: Docker, Docker Compose, Nginx, CI/CD Pipelines, Vercel, Render, AWS (S3)

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Microservices Architecture, Operating Systems, Computer Networks, DBMS, Asynchronous Programming, Secure Coding Practices, RESTful API Design.

EXPERIENCE

Aroha Technologies — Software Development Engineer

July 2025 – February 2026

- Contributed to iBridge360, an enterprise learning platform, building the Capability module that lets users select a course and take assessments across multiple question types (single-correct MCQ, multiple-correct MCQ, audio-based, and video-based), using **REST API integration and Redux Toolkit** in React.js with Tailwind CSS for the frontend.
- Designed and built a custom course selector enabling users to curate a personalized learning path by choosing a language or database, adding selections to a cart, and submitting their details through an integrated form (synced to Google Forms) for follow-up on course fees — improving cost transparency and course discoverability for users.
- Applied **SQL indexing** strategies to improve query performance and reduce response times for course and assessment data.
- Integrated an AI-powered chatbot to **handle real-time enquiry support**, improving responsiveness for user queries.

PROJECTS

AI Interview Preparation Platform — MERN Stack + Google Gemini API [GitHub](#) | Live: interviewprep-gen-ai.vercel.app

- Built a full-stack application using **React.js, Node.js, Express.js**, and **MongoDB** that analyses resumes and job descriptions to generate personalized interview strategies.
- Integrated **Google Gemini API** for match scoring, skill-gap analysis, and structured preparation roadmaps; implemented PDF parsing and resume generation workflows.
- Secured the application with **JWT authentication** and **Zod input validation**; deployed via Vercel (frontend) and Render (backend).

Taskify — Task Management System — MERN Stack [GitHub](#) | Live: taskify-frontend-vxsj.onrender.com

- Developed a full-stack task management application with **CRUD operations**, status filtering, and priority categorization using **React.js** and **Node.js/Express.js**.
- Implemented JWT-based authentication, **Mongoose schemas with validation**, and secure **REST API endpoints with role-based access control**.
- Built a responsive UI with React.js, **Redux**, and Tailwind CSS following a clean, **modular component architecture**.
